

HTML Lab Question:

1. Title: *Online Bookstore Web Page*

Objective:

Create a **multi-section HTML webpage** for an online bookstore using only **basic HTML tags** like `<html>`, `<head>`, `<title>`, `<body>`, `<h1>`–`<h6>`, `<p>`, `<img>`, `<table>`, `<ul>`, `<ol>`, `<a>`, `<form>`, `<input>`, `<textarea>`, `<select>`, `<option>`, `<iframe>`, etc.

Instructions:

1. Page Title & Heading

- Set the title as "BookWorld - Your Online Bookstore".
- Use `<h1>` for the main heading.

2. Banner Image & Description

- Display a banner image of books.
- Write a short paragraph describing the bookstore.

3. Book Categories Table

- Create a table with columns: **Category**, **Number of Books**, **Top Author**.
- Use table border and proper alignment.

4. Best-Sellers List

- Create an ordered list of 5 best-selling books.
- Create an unordered list of 5 upcoming book releases.

5. Book Preview

- Embed a book preview video using `<iframe>` from YouTube.

6. Registration Form

- Create a form with:
 - Name (text)
 - Email (email input type)
 - Favorite Genre (dropdown menu)
 - Comments (textarea)
 - Submit button

7. Links Section

- Add at least 3 hyperlinks to external book-related websites.
- Add one link that opens in a new tab.

8. Contact Info

- Provide bookstore address, phone number, and email using basic HTML formatting.

Expected Output:

A single HTML page for an online bookstore that combines **headings, paragraphs, images, tables, lists, forms, iframes, and links** in a clean layout.

Welcome to BookWorld

BookWorld is a premier online bookstore. There's a penendum of a wise range of gentes silneed to derive generous seasment, and secure shopping ex-

Book Categories

Category	Number of Books	Top Author
Fiction	2,345	J.K. Rowling
Non-Fiction	1,789	Malcolm Gladwell
Children's	1,234	Roald Dahl
Science	980	Stephen Hawking

Best-Sellers

1. The Great Gatsby by F. Scott Fitzgerald
2. To Kill a Mockingbird by Harper Lee
3. 198A by George Orwell
4. The Catcher in the Rye by J. D. Salinger
5. The Hobbit by J.R.R. Tolkien

2.

Lab Task

You are to design an “**Online Conference Registration Form**” with the following requirements:

1. Form Setup

- Use `<form>` with `action`, `method="post"`, and `enctype="multipart/form-data"`.
- The form should be divided into **three sections**:
 1. **Personal Information**
 2. **Account Preferences**
 3. **Payment Details**

2. Personal Information

- Fields:
 - **Full Name** (`<input type="text">`)
 - **Email Address** (classic `type="text"` with a note like “*format: user@example.com*” instead of HTML5 `type="email"`)
 - **Gender** (`<input type="radio">`)
 - **Country** (`<select>` with at least 5 countries)
 - **Profile Photo Upload** (`<input type="file">`)
- All required fields should use the required effect **without** HTML5 required attribute (instead, write validation instructions and rely on JavaScript).

3. Account Preferences

- Fields:
 - **Username** (`<input type="text">`)
 - **Password** (`<input type="password">`)
 - **Confirm Password** (`<input type="password">`)
 - **Interests** (`<input type="checkbox">` list — e.g., Web Development, AI, Cloud, etc.)
 - **Preferred Contact Method** (`<select>` or radio buttons)
 - Add a **textarea** for “Special Requirements / Comments”.

4. Payment Details

- Fields:
 - **Payment Method** (<select> with Credit Card, Debit Card, PayPal)
 - **Card Number** (<input type="text">)
 - **Expiry Date** (Use 2 <select> dropdowns for Month and Year)
 - **CVV** (<input type="password"> with size=3)
- Include a “**Terms & Conditions**” checkbox.

5. Form Controls

- **Submit** and **Reset** buttons at the end.
- Align form using a table-based layout (since CSS grid/flexbox was not common pre-HTML5).
- Apply **inline CSS** for basic styling.

ONLINE CONFERENCES REGISTRATION FORM

3. Lab Question – Grocery Order Form

Task:

Create an **HTML5 Grocery Order Form** with the following requirements:

1. **Form title:** "Online Grocery Order" using `<h2>`.
2. Use **fieldset** and **legend** to group:
 - **Customer Details**
 - **Order Details**
3. **Customer Details:**
 - Full Name (**type="text"**, required, placeholder)

- Email (**type="email"**, required)
- Mobile Number (**type="tel"**, pattern for 10 digits)
- Delivery Address (**textarea**, required)

4. Order Details:

- Grocery Items (**checkboxes** for at least 5 items – e.g., Rice, Milk, Bread, Eggs, Sugar)
- Quantity (**type="number"**, min=1, max=10)
- Delivery Date (**type="date"**, required)
- Preferred Delivery Time (**type="time"**)
- Payment Method (**radio buttons** – Cash on Delivery, UPI, Card)

5. A "**Special Instructions**" field (**textarea**, optional).

6. Checkbox for "**I confirm my order**" (required).

7. Submit and Reset buttons.

8. HTML5 attributes to use:

- **required**
- **placeholder**
- **pattern**
- **autofocus**
- **min / max**
- **multiple** (optional for items if using select)

9. Form should submit to "order.php" using **POST** method.

4.

Lab Question

Title: Create a Semantic HTML5 Feedback Survey Form

Objective:

Build a feedback survey page for a website using **HTML5 semantic elements** to make the structure meaningful and accessible.

Requirements:

1. Header Section (<header>):

- Title: "Website Feedback Survey"
- Short description: "We value your opinion. Please take a minute to share your thoughts."

2. Navigation (<nav>):

- Dummy links: Home, About, Contact (href="#").

3. Main Content (<main>):

- **Section 1 (<section> – Personal Info):**
 - Full Name (text, required)
 - Email Address (type="email", required)
 - Age (type="number", min=10, max=100)
- **Section 2 (<section> – Website Rating):**
 - Rate website design (type="range", 1–10)
 - Rate content quality (radio: Excellent, Good, Average, Poor)
 - Most visited page (dropdown: Home, Blog, Products, Contact)
- **Section 3 (<section> – Suggestions):**
 - Comment box (<textarea>) for suggestions
 - Checkbox for "I agree to be contacted regarding my feedback"

4. Aside (<aside>):

- Show a motivational note like: "Your feedback helps us improve our website experience for everyone."

5. Footer (<footer>):

- Show copyright: "© 2025 Website Survey"

6. HTML5 Form Features to Use:

- required, min, max, type="email", type="number", type="range"
- Semantic tags (<header>, <main>, <section>, <aside>, <footer>)

8.

Create an HTML page for a **Furniture Store** using **internal CSS** (inside the `<style>` tag in the `<head>`) and **inline CSS** (inside the `style` attribute of HTML elements).

Instructions:

1. Create a web page named **furniture.html**.
2. Add a page title "**Furniture Store Catalog**" in the browser tab.
3. The page should contain:
 - A **header** with the store name and a short tagline.
 - A **product section** displaying at least **3 furniture items** (e.g., sofa, table, chair).
 - Each product must have:
 - An **image** (real or placeholder).
 - A **name**.
 - A **short description**.
 - A **price**.
 - A **Buy Now** button.
4. **Internal CSS** should style:
 - Page background color.
 - Font family.
 - Product card layout (border, padding, margin).
 - Image size.
 - Button color and hover effect.
5. **Inline CSS** should be used for:
 - Changing the background color of **one specific product card**.
 - Changing the text color of **one specific product title**.
 - Changing the button style of **one specific product**.
6. Make sure the layout is neat and visually appealing without using external CSS or JavaScript.

9.

Create an **interactive shopping website layout** using **only HTML and external CSS** (no internal or inline CSS).

Instructions:

1. Files to Create:

- `shopping.html` — main HTML page.
- `styles.css` — external stylesheet for all styling.

2. Page Structure:

- **Header Section**
 - Store name (e.g., *"ShopEase Online"*) in large bold text.
 - Tagline (e.g., *"Your One-Stop Shop for Everything"*).
 - A horizontal **navigation bar** with links: Home, Products, Offers, Contact.
- **Hero Banner**
 - A large banner image with promotional text (e.g., "Mega Sale – Up to 50% Off!").
 - A "Shop Now" button.

- **Product Grid Section**
 - Display at least **6 products** in a responsive grid.
 - Each product card should have:
 - Product image.
 - Name.
 - Short description.
 - Price.
 - "Add to Cart" button.
 - **Special Offer Section**
 - Highlight 1–2 featured products with a different background style.
 - Include a “Limited Time Offer” label.
 - **Customer Reviews Section**
 - At least 3 customer testimonials in styled boxes.
 - **Footer Section**
 - Contact information (email, phone).
 - Social media icons (use text placeholders if images aren’t available).
 - Copyright text.
-

3. Styling Requirements (**styles.css**):

- **General**
 - Use a clean font (Google Fonts optional).
 - Background color for the body.
 - Max-width for the content area and center alignment.
- **Header**
 - Fixed position at the top.
 - Background color and shadow.
 - Navigation links styled with hover effect.
- **Hero Banner**
 - Large background image covering full width.
 - Overlay text and button with contrasting colors.
- **Product Grid**
 - Grid or flex layout for product cards.

- Card hover effect (e.g., scale up slightly or shadow change).
 - Button hover color change.
 - **Special Offer Section**
 - Different background color.
 - Bigger product images.
 - **Customer Reviews**
 - Box styling with borders or shadows.
 - Italicized testimonial text.
 - **Footer**
 - Dark background with light text.
 - Links change color on hover.
 - **Responsive Design**
 - For screens below 768px: stack navigation vertically and make products one per row.
-

4. Additional Features to Add:

- Use CSS transitions for hover effects.
 - Add a “Sale” ribbon using CSS positioning.
 - Ensure all images have `alt` text for accessibility.
 - Use `:hover`, `:focus`, and `:active` states in CSS.
-

✓ Deliverables:

- `shopping.html` with proper HTML5 structure.
- `styles.css` linked in `<head>` of HTML file.
- At least 6 product cards.
- Fully responsive layout.

Title: Create a Professional Tuition Catalog using Bootstrap Cards

Task:

Design a responsive tuition catalog webpage using Bootstrap 5 that meets the following requirements:

1. Use **at least three cards** to display different tuition courses (e.g., Mathematics, Science, English).
2. Each card must contain:
 - A course **image**
 - **Course title** in bold with a unique color
 - Short **description**
 - **List of details:** Teacher name, Duration, and Fee
 - A "**Enroll Now**" **button** with a color theme matching the card title
 - A **badge** showing “Best Seller”, “New”, or “Popular”
 - A **footer** with additional info (e.g., “Limited seats available”)
3. Cards must be arranged in a **responsive grid** that shows three cards per row on large screens, two on medium screens, and one on small screens.
4. The design should look **professional** with spacing, padding, and shadows.

Professional Tuition Catalog

Mathematics Tuition

Expert coaching for Class 8–12. Includes weekly tests, exam preparation, and doubt clearing.

3.

Design a responsive Bootstrap navigation bar for an “Online Pooja Store” website.

The navigation bar should include:

1. A brand name/logo on the left with the text **Online Pooja Store**.
2. Navigation links: **Home, Products, Offers, Cart, Contact Us**.
3. A **dropdown menu** under **Products** containing items: *Pooja Kits, Idols, Flowers, Incense Sticks*.
4. A **search box** on the right side to search for products.
5. Make the navbar **responsive** with a hamburger menu on smaller screens.
6. Use **Bootstrap 5** classes and proper semantic HTML.

4.

Title: Create a Tirupati Temple Online Booking Form using Bootstrap

Task:

Design a **responsive Bootstrap 5 form** for **Tirupati Temple Darshan Ticket Booking** with the following requirements:

1. Form Title & Header:

- Title: "Tirupati Temple Darshan Booking Form"
- Center-aligned with temple logo/icon at the top.

2. Form Fields (with Validation):

- **Full Name** (text, required)
- **Email Address** (email, required)
- **Mobile Number** (tel, required, pattern for 10 digits)
- **Gender** (radio buttons: Male, Female, Other)
- **Darshan Date** (date picker)
- **Darshan Time Slot** (select dropdown: Morning, Afternoon, Evening)
- **Number of Tickets** (number input, min 1, max 10)

- **Seva Type** (checkboxes: Archana, Abhishekam, Special Entry Darshan, Suprabhata Seva)
- **ID Proof Upload** (file input, accept image/pdf)
- **Address** (textarea)

3. Advanced Features:

- Use **Bootstrap grid system** for proper alignment on all screen sizes.
- Apply **form-floating** for at least one field.
- Use **input groups** for fields like mobile number with country code.
- Use **Bootstrap validation classes** (is-invalid, is-valid).
- Add a **tooltip** for ID proof upload requirements.

4. Form Buttons:

- **Submit** (primary color, full width)
- **Reset** (secondary color, full width)

5. Design:

- Form should be **centered** inside a card with **shadow** and **rounded corners**.
- Use **Bootstrap spacing classes** for proper padding/margin.
- Make the form **mobile-friendly**.

6. Extra Credit (Optional):

- Show a **modal popup** after submission saying “Your Tirupati Darshan Booking is Confirmed!”

Title: Share Market Webpage using Bootstrap Grid, Cards, and Navigation

Objective:

Design a **responsive Share Market webpage** using **Bootstrap's Grid System, Cards,** and **Navigation bar** to display market trends attractively.

Requirements:

1. Navigation Bar (Full width, top)

- Brand name: "**Share Market**"
- Navigation links: *Home, Market Trends, Top Gainers, Top Losers, Contact*.
- Make it responsive with the **navbar-toggler** for mobile view.

2. Main Content – Use **Bootstrap Grid System**:

- **Row 1:**

- **Col-md-4:** Card showing **Top Gainer** stock (company logo, name, price, % change in green).
- **Col-md-4:** Card showing **Top Loser** stock (company logo, name, price, % change in red).
- **Col-md-4:** Card showing **Most Active** stock (logo, name, volume traded).

- **Row 2:**

- **Col-md-6:** Card with a list of **Trending Stocks**.
- **Col-md-6:** Card with a short **Market Summary** paragraph.

3. Cards must use:

- `.card`, `.card-body`, `.card-title`, `.card-text`
- Relevant **Bootstrap text utilities** like `.text-success`, `.text-danger`, `.fw-bold`.

4. Footer (Full width, bottom):

- Centered text: *"Data for educational purposes only — Share Market 2025"*.

5. The design must be **fully responsive** for mobile, tablet, and desktop.

The share market has been performing positively, with major indices showing an upward trend. Investors are optimistic about the economic recovery and corporate earnings.

Data for educational purposes only — Share Market 2025

6. Title: Real Estate Website Homepage using Bootstrap Components

Objective:

Create a **responsive Real Estate homepage** that uses **Bootstrap's Grid System, Typography, Navbar**, and **Button enhancements** to showcase property listings.

Requirements:

1. Navbar

- Use navbar, navbar-expand-lg, and navbar-dark bg-dark.
- Brand name: **"Dream Homes"**.
- Menu items: *Home, Properties, About Us, Contact*.
- Responsive with navbar toggler for mobile.

2. Header Section (Full width)

- Use **Bootstrap Typography**:
 - Main heading: "Find Your Dream Home" (display-4 fw-bold text-center).
 - Subheading: "Best properties at the best prices" (lead text-center text-muted).

3. Property Listings Section (Grid System)

- Use `.container` and `.row`.
- **3 columns (`col-md-4`)** — each column contains a **Bootstrap Card**:
 - Property image (use a placeholder image).
 - Card title: Property name.
 - Card text: Short description.
 - A **Bootstrap button** (`btn btn-primary btn-sm` for “View Details”, `btn btn-success btn-sm` for “Book Now”).
- Use `.me-2` for button spacing.

4. Footer

- Full-width footer with `text-center text-white bg-dark py-3`.
- Text: "© 2025 Dream Homes. All rights reserved.".

5. Button Enhancements

- Use **different button colors** (`btn-primary`, `btn-success`).
- Use `btn-sm` for smaller buttons.
- Use hover effects with `:hover` in a `<style>` tag to change button shadows.
